H. Case study: (4)

Braille script is a script which is used by the blind people to read. It is a special type of writing which has raised dots on the paper. This script was developed by Louis Braille in 1824. This script has enabled blind people to read and study. A blind person can read the words by putting his finger tips over the raised dots. The development of this script has helped blind students to compete with normal students in the field of education.

1. What is Braille script?
2. Who invented Braille script?
3. In which year he invented Braille script ?
4. How do blind people use this script ?
